X. Indemnification and Liability

By executing this MOU, each entity agrees to work together to deliver One Stop services for employers, employees and those seeking employment. Addendum

Each partner must contribute a fair share of the operating costs of the comprehensive One Stop Center proportionate to the use of the Center by the partner's program (benefit received). Although, federal regulations and circulars do not specify a method to determine applicable costs or the fair share for participating programs, the general guidance is to allocate costs based on benefit received provided that the cost is allowable under program regulations and statute and that method is applied consistently. Benefit received may be defined by a combination of factors including the number of individuals served, the number of computers used and for the amount of space used in a facility. The methodology used depends on the character of the cost; intake of individuals, utilities, telecommunications, etc.

The U.S. Department of Labor has issued detailed guidance through the publication of the One Stop Comprehensive Financial Management Technical Assistance Guide and updated it in the Joint Rule at 20 CFR 678.700 to 678.760. Additional requirements can be found in the Federal Cost Principles of the Uniform Guidance at 2 CFR part 200.

Following are excerpts from the Guide:

- Those partner agencies providing the services through the One Stop Center for their local area have the responsibility to identify shared costs. Shared costs are defined as those costs of the One Stop center that benefit multiple partners and are incurred in support of the services delivered through a One Stop.

- Each partner contributes a fair share of the operating costs of a One Stop Center proportionate to the use of the Center by customers who are attributable to the partner's program, in accordance with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards” (Uniform Guidance), in 2 CFR part 200. While this requirement is intended to ensure that partners establish standards for whether or not each partner program is required to share in a particular cost, it does not prescribe the exact methodology to be used to allocate shared costs nor determine each partner's proportionate share. In fact, the regulations make it clear that partner agencies may choose from any number of methods, provided they are consistent with the OMB circulars.

- Any method that initially uses estimated numbers, whether participants, data elements, space use, or other costs that must use pre-budgeted amounts, must be adjusted to actual data when it is available. Determining the proportionate shares attributable to the specific partner programs is the preliminary phase in the process. In this preliminary stage, the partners review the shared costs budgets, determine which methodologies are acceptable, and, from the acceptable methodologies, which method should be applied to the shared costs. In other words, the partners are selecting the appropriate allocation base for the shared costs. One simple method that may be employed to determine proportionate share would be based on participation by eligible customers. Under this method, in its most basic form, the proportionate share would be determined by comparing the number of individuals either eligible for or receiving services from a partner to the total number of participants served.

Partners are expected to comply with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR issued December 26, 2013). The Uniform Administrative Requirements supersedes OMB Circular A-21, A-87, A-122, A-110 and A-133.

Electronic One Stop partners are expected to contribute in the One Stop operating costs. Partners providing program services electronically through a One Stop Center, such as program services available on a partner organization's website, are required to participate in funding costs that are appropriately associated with making the services available. Such costs may be associated with computer equipment or communication line costs. The partners are to agree on a methodology to be used to identify and allocate these costs to the benefiting programs. Partners will be billed monthly based on their share of the attached Prince William Cost Allocation Plan. Quarterly expenditures will be reconciled to billings and an adjusting bill/credit with the reconciliation documentation will be sent to the partners to pay or deduct from the next monthly billing.

APPROVAL: The undersigned Agencies bind themselves to the faithful performance of this Addendum. It is mutually understood that this Addendum shall not become effective until executed by all Parties involved.
